Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shavit et al. in view of Park '375.

Shavit et al. disclose, or inherently teach, all of the limitations of the claims including: supply chain management using a network, receiving data from a plurality of outlets, and forecasting activity in the supply chain using the data (See for example Col. 7, line 19); but lacks the specific teaching of checking the data for errors, identifying a source of the error, correcting the error and transmitting a log of the error(s) to a manager.

Park teaches an automatic accounting processor that identifies and corrects errors on a real-time basis for businesses.

It would have been obvious to one of ordinary skill in the art at the time of the invention to check the data for errors (See Park, for example, Col. 13, lines 12-28), identify a source of the error(s), correct the error(s), in view of Park, in order to have proper financial control of transactions (See Park, for example, Col. 13, lines 1-12).

Re claims 6, 12, and 18; the transmission of a log of the error(s) to a manager would be an obvious design choice to one of ordinary skill in the art that is well known in the industry in

order for the manager to determine the reliability of the transaction system and the accounting system.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
